Specifications

Length of coupling on rear lift :	1 600 mm (2 700 mm with gauge wheels)
Length of coupling on front lift :	800 mm
Width :	2 500 mm (2 550 mm with smoother-finisher)
Frame height :	800 mm
Weight :	860 kg (coupling to rear lift)
Weight :	520 kg (coupling to front lift)
Teeth spacing :	100 mm
Teeth thickness :	18 mm
Teeth height :	660 mm
Adjustable-height ground contour following wheels	

Performances

Working width :	2 500 mm
Working depth :	0 to 450 mm
Suited to all grain sizes and to pebbles (up to C 60/80)	
Can be used on dry or wet sand and on all configurations of beaches.	
Type of waste :	large debris seaweeds, reeds, wood, plastics, concrete and steel
Area efficiency :	Up to 40 000 m² / h

The best choice to eliminate the large debris built up during winter and thus ensure that the beaches are safe before using the sifters, the R250 L rake can also be part of the regular summer maintenance schedules.

Highly versatile thanks to a system of reversible davit arms

- Coupling to front lift in order to deal with high volumes of wastes (storms, etc.) and to reshape certain beach areas (water edge walks, etc.)
- Coupling to rear lift for regular beach combing and reshaping. The hydraulically actuated smoother ensures an excellent finish.

A very robust design

Hot galvanizing, by dipping the frame and the various parts for the best anticorrosion protection. High-quality steels, sized to stand the beach working conditions in the long run.

Optional equipment

- Bulldozer blade
- Smaller widths on demand
- Teeth spacing on demand

Tractor requirements

- Recommended power: from 70 HP
- Coupling: rear lift-arm and 3-point hitch
- Hydraulic system: 1 double-action

In our workshops located on the Aquitaine littoral, we have manufactured machines for cleaning beaches and sandy areas (hippodromes, riding centers, water treatment basins, agricultural areas, etc.) for more than 25 years.

Thanks to our close proximity to the littoral environment, along with our large customer base around the world and our passion for innovation, «Canicas» is now a brand of reference well-known for its robustness, reliability and performances.

A company close to its customers, and high-quality services:

- A constant supply of spare parts
- An after-sale service provided by our skilled technicians
- Fast response times ensured by our workshop trucks or tool-carrier trucks in France, and by our distribution network abroad
- Rental of machines
- Loan of machines in the event of accidental damage to cope with machine downtime.

Our company reserves the right to change at any time the products proposed to and referenced by our customers, without notice and without entitling the reader to damage or interest.
