**This model meets a very strong demand for compact, very maneuverable and high performance machines.**

Its 1700-mm working width and high area efficiency result in an excellent price / quality / performance ratio. Our line of machines evolves to keep pace with the change in beach configuration and provide the most suitable technical solution.

In addition this new sifter requires small and medium-sized tractors typically designed for green spaces or orchard areas, which makes it the most budget-friendly option.

Based on many years of experience and of meeting your expectations, this model embodies the core principles of our line: robustness, reliability and simplicity.

High-quality steels and perfectly sized parts ensure long-term resistance to the constraints of sand sifting. Hydraulic system: powerful, simple, reliable and secured.

## Specifications

Length :	<b>4 060 mm</b>
Width :	<b>2 045 mm</b> (smoother-finisher) / <b>2 000 mm</b> (outside tires)
Overall height :	<b>1 840 mm</b>
Weight empty :	<b>1 260 kg</b>
Hopper capacity :	<b>700 liters</b>
Dump height :	<b>From 800 mm to 1 700 mm</b>
Forward blade :	<b>All steel 12 mm</b>
Number of vibrating rollers :	<b>2</b>
Hydraulic tank :	<b>40 liters</b> (integral with the frame)
Sound level :	<b>&lt; 70 dB</b>
Low-pressure tires :	<b>26 x 12.00 x 12</b>
Drive :	Hydraulic pump and motors for driving the screening belt and beater
Anticorrosion treatment :	<b>Hot galvanizing by dipping the frame and various parts</b> (hopper, lifting system, beater, etc.). This ensures the best protection, including the bore of tubular parts.

## Performances

Working width :	<b>1 700 mm</b> (up to 1 900 mm optionnally)
Working depth :	<b>0 to 180 mm</b>
Can be used on dry or wet sand	
Type of waste :	seaweeds, reeds, wood, plastics, cans, rubble, glass, large debris
Area efficiency :	<b>up to 20 000 m<sup>2</sup> / hour</b> - 200,000 sq. ft / h (depending on beach conditions)

## Optional equipment

- Two-component paint applied on hot-galvanized steel by dipping
- Hopper hood
- Hydraulic hourmeter
- Cab-operated screening belt rotation-reverser
- Other options (refer to customer service)

## Tractor requirements

- Recommended power: from 45 - 50 HP / 4 driving wheels
- Tires: recommendations defined according to the tractor model
- Coupling: coupler carrier on rear lift-arm
- Hydraulic cylinders: 2 double-acting
- Power takeoff: 6 grooves 3/8" 540 RPM

In our workshops located on the Aquitaine littoral, we have manufactured machines for cleaning beaches and sandy areas (hippodromes, riding centers, water treatment basins, agricultural areas, etc.) for more than 25 years.

Thanks to our close proximity to the littoral environment, along with our large customer base around the world and our passion for innovation, «Canicas» is now a brand of reference well-known for its robustness, reliability and performances.

A company close to its customers, and high-quality services:

- A constant supply of spare parts
- An after-sale service provided by our skilled technicians
- Fast response times ensured by our workshop trucks or tool-carrier trucks in France, and by our distribution network abroad
- Rental of machines
- Loan of machines in the event of accidental damage to cope with machine downtime.

Our company reserves the right to change at any time the products proposed to and referenced by our customers, without notice and without entitling the reader to damage or interest.
